

Domestic Appliances and Personal Care

Service Manual

MSH-coding 8827 132 00000

PRODUCT INFORMATION

Voltage	: 100, 120, 220-240 V
Frequency	: 50-60 Hz
Power consumption	: 1000 W (kettle)
	: 650 W (coffeemaker)
Contents kettle	: 1000 cc
Contents jug	: 650 cc
Coloursetting	: white

SERVICE INFORMATION

Thermostat switch-off temp.	: 140 °C (item 13)
Thermal fuse cut-off temp.	: 216 °C (item 12)

REPAIR INSTRUCTIONS (coffeemaker)

1. Electrical circuit

When the appliance does not work, check the electrical circuit. If the thermal fuse or thermostat prove defective, the complete pump unit has to be replaced.

2. De-scaling

If the water system is nearly or less clogged by scale then operate the coffeemaker a few times with vinegar or with a 10-15% solution of either vinegar-acid, citric-acid or tartar-acid, into cold tap water.

Do not use other de-scaling agents as these may harm the appliance.

If this procedure does not restore the function, then switch off the coffeemaker when the acid has passed through during appr. 3 min. Keep the appliance in this condition overnight and continue/repeat the cleaning operation. After the de-scaling procedure, operate the coffeemaker twice with tap water in order to rinse away any residual substances.
